

Dear Sam,

I write this letter to you to say thanks for all your help to make our office shop front one of the best

Last year we redesigned our office and wanted to add some large LCD screens. We tried all types of screens in the front windows but were almost unreadable because of the sun and glare. So I Googled around and found IVisual. Not only did Sam have the type of anti glare screens that I needed and the software to automatically display all our listings, slides and movies on these screens with the ease of a user friendly website, Sam was able to drive up to our office to prove they would work. I was glad he did. We ended up buying 3 screens and 2 more computers. 2 for our Port Macquarie office and 1 for our Lake Cathie office.

The Screens look fantastic and are a major part of our window display, I would like to thank Sam and his team for helping us to make our window display one of the best in our area and would highly recommend them to anyone looking to refit there office.

Regards
